

for Sharp OSA III and Sharp OSA II

Enterprise Fax Server Solution for desktops and Sharp OSA®-enabled MFPs at a Small Business Price

Reduce Costs

- Fax paper documents (signed contracts, etc.) from **any Sharp OSA-enabled MFP - no extra cost for Sharp Fax Expansion Kit and telephone line needed.**
- **Eliminate unnecessary printing costs** - toner, ink, paper, maintenance, etc. Receive faxes directly into user's email or secured document folders. **Go Green!**
- **4 to 1 savings** - replace 4 fax telephone lines with 1 shared GoldFax line - **instant ROI!**

“GoldFax **reduced our costs** for phone lines and supplies, **increased the productivity** of our people, and **protected the privacy** of our faxed documents at **less than the cost** of two MFP Fax Expansion Kits.”

Improve Productivity

- **Automated routing of inbound faxes into user's email or document folders** - using personal Direct Inward Dial fax numbers, CSID - TSID, or Caller ID.
- **Send faxes directly** from Microsoft® Office or other desktop applications, any email (Outlook, OWA, Notes, etc.), or any internet browser (PC or Mac).
- **Automate faxing of critical business documents** (Purchase Orders, Invoices, Confirmations, etc.) from your financial, ERP, CRM, Document Management systems: Oracle™, SAP™, Crystal Reports®, Microsoft Dynamics™, SharePoint®, Sage™, etc.
- **Integrate with any software** on any computing platform including Windows server, UNIX®, Linux®, Solaris™, AIX®, OpenVMS™, IBM AS/400®, and any web-based application.

Increase Security

- **Eliminate** fax documents from laying out in the open. Protect confidential information.
- **Secure** faxing from Sharp MFP and desktop with network login.
- Auto archive all received and sent faxes for **compliance, auditing, and records.**
- Integrates with **any document management system.**

Send faxes from Microsoft Office, any desktop application, any email, any internet browser, and any Sharp OSA®-enabled MFP.

Send faxes securely without printing - directly from Windows Office or other desktop applications, any Microsoft Outlook® Exchange, Lotus Notes Domino®, GroupWise®, or any SMTP/POP3 email system, or any internet browser (PC or Mac). GoldFax is just a virtual printer on the network. If you can print it, you can GoldFax.

Fax paper documents “walk up faxing” from Sharp OSA-enabled MFPs. No Fax Expansion Kit or phone line required. Secure faxing with a network login. *Requirements: Sharp OSA II or OSA III, MX-AMX2 Application Communication Module, Network Scanning.*

Receive faxes in email, GoldFax Inboxes, network folders, or on printers.

Automated routing of inbound faxes. If your telephone system supports Direct Inward Dial or other routing capability, you can have personal - confidential fax numbers for key people. GoldFax routes faxes directly to individuals or group mailboxes giving you complete security.

Automate Faxing - Send from Production applications.

Automate sending of faxes from your production applications. GoldFax can fax-enable any software application. Automate the faxing of critical business documents (Purchase Orders, Invoices, Confirmations, etc.) from your financial, ERP, CRM, ECM, Document Management systems like Oracle™, SAP™, Crystal Reports®, Microsoft Dynamics™, Sage™, etc. GoldFax will lower your costs and improve your business processes. No more printing and manual faxing.

Archive Received and Sent Faxes.

Automatically archive all received and sent faxes to network folders - easily integrated into **any document management system.**

Technical: Easy to Install and Use. Low resource usage. Low ongoing cost.

GoldFax supports **analog phone lines, digital T1/E1, and Fax Over IP** solutions. GoldFax is available as software, software with fax hardware (Dialogic Brooktrout or MultiTech), or pre-configured appliance (HP or Dell). GoldFax is built on Microsoft's **.NET technology**, runs on a Windows server, is Citrix “friendly” and works with Terminal Services.

Customers: from small businesses to large enterprise organizations.

DPD, the Makers of GoldFax, has been developing office and network software for 35 years. Industry leading organizations worldwide have selected GoldFax for their critical fax document delivery solutions - including small, medium, and Fortune 1000 companies, government, and universities with over 1,000,000 end-users.
