GoldFax is First Fax Server Integrated with Samsung XOA MFPs

Irvine, CA. – February 16, 2011: DPD International today announced that their GoldFax network fax server software is fully integrated with Samsung's new line of XOA MFP devices and is available immediately worldwide through Samsung MFP dealers. It provides an easy to use interface to send faxes from any Samsung XOA enabled MFP without the need for a fax kit on the MFP or dedicated telephone line. Customers can connect an unlimited number of XOA MFPs over their existing IP network to their GoldFax server to share inbound and outbound fax lines for significant cost savings.

"We are very happy with our partnership with Samsung," said Tom Politowski, President of DPD International. "It is an honor to be part of the Samsung team whose technical reputation and consistency of quality creates a great environment for innovation and growth of fax applications. The new Samsung XOA MFPs are exciting products and we expect them to be very successful with the price advantage GoldFax gives them over their competition. The Samsung sales, marketing and technical teams in North America and Europe are trained on GoldFax for Samsung XOA and the advantages it offers."

GoldFax for Samsung XOA delivers a secure fax capability for sending and receiving confidential documents. Organizations will experience operational cost savings, an improvement in productivity and efficiency and enhanced security and compliance measures.

Every business and organization is searching for ways to cut costs and for solutions that can provide immediate savings. With GoldFax for Samsung XOA, managers can centrally control and manage fax activity added with the capability of sending, receiving and storing documents from desktops, MFPs or mobile devices. The cost savings in paper, toner supplies and storage produces an ROI in less than one year. GoldFax also integrates easily with every document management system.
