New Native GoldFax Connector for Kyocera MFPs Reduces Equipment and Telecommunication Costs

IRVINE, CA & FAIRFIELD, N.J. July 25, 2011 - DPD International, the makers of GoldFax, and Kyocera Mita America, Inc., one of the world's leading document solutions companies, announced the full integration of DPD's GoldFax network fax server software with HyPAS enabled Kyocera multifunctional products (MFPs) to securely send faxes without the need for a fax kit or dedicated telephone line. Organizations can connect an unlimited number of HyPAS enabled Kyocera MFPs over their existing IP network to their GoldFax server to share inbound and outbound fax lines for significant cost savings and improved productivity.

"We are excited with to be working with Kyocera," said Tom Politowski, President of DPD International.

"Every organization is searching for ways to cut costs and for solutions that can provide immediate savings and more efficient operations. Kyocera's HyPAS technology with the GoldFax integration increases Kyocera MFP users' productivity and security for sending and receiving important documents by fax while significantly reducing costs to their organization in equipment and ongoing expenses. The savings in paper, toner supplies and storage produces an ROI in just a few months."

GoldFax for HyPAS enabled Kyocera MFPs delivers an easy to use interface to send faxes securely through a central server - protecting confidential information while meeting compliance regulations. End users can send faxes from any application and receive faxes directly into email inboxes and network folders. All fax documents are stored in a searchable and retrievable archive in case of any need to respond to a litigation request or clarification on purchase orders, contracts, applications, patient information, etc.

Having the capability of sending, receiving and storing documents from desktops, MFPs or mobile devices, with GoldFax for HyPAS enabled Kyocera MFPs, managers can centrally control and oversee all
