GoldFax 8.0

*We are excited to announce the release of **GoldFax Version 8**. GoldFax 8.0 has been running in production at specific customer sites. It has been tested in many environments and is ready for release. If your annual maintenance is current then please contact GoldFax technical support for information. Professional services for server migrations or server upgrades are available at additional cost.*

*"GoldFax **reduced our costs** for phone lines and supplies, **increased the productivity** of our people, and **protected the privacy** of our faxed documents."*

New features include:

- **New GoldFax Cloud** – Send / receive faxes via GoldFax Cloud Fax Telephone Service. Replaces your existing fax telephone service. Integrate GoldFax with your networked Multi-Function Products (MFPs) and applications.

- **NEW SIP Trunk Provider Support** – fax via "virtual lines" with an Internet connection using SIP Trunk Providers including babyTEL

- **NEW FoIP (Fax over IP) support with XCAPI**

- **NEW Disaster Recovery Capability** using GoldFax Cloud or SIP Trunk Providers

- **NEW GoldFax Insight Option** – Archive, search, retrieve, and reporting of all sent and received faxes with a new easy to use Web browser based interface

- **Kyocera** HyPAS MFP support with a customizable GoldFax interface

- **Samsung** XOA MFP support with a customizable GoldFax interface

- **Sharp** OSA v4 MFP support with a customizable GoldFax interface

- **Single sign-on (SSO)** support for Kyocera, Samsung, and Sharp MFP's using the customizable GoldFax interface

- **Supports New 6.0** release of Dialogic Brooktrout Driver

- **Canon** scan-to-email enabled MFPs now supported by GoldFax

- **Lexmark** Fax Server Mode enabled MFPs now supported by GoldFax

- **Muratec** E-mail Gateway enabled MFPs now supported by GoldFax

- **Toshiba** Enhanced Scan Template enabled MFPs now supported by GoldFax

- **XEROX** Server Fax enabled MFPs now supported by GoldFax

- Latest Dialogic Brooktrout drivers including SR140 FoIP (Fax over IP) capability and the Dialogic Media Gateways. Latest Brooktrout SDK support.

- Improved attachment rendering speeds. Faster throughput and higher performance.

- New time-based received routing – faxes can be auto routed to different locations based on the time of the day received and the preferred recipient

- Enhanced transmission reports – any page or pages of the fax can be included on the report

- Export options enhanced to include BMP and PDF/A Archiving Standard file types

- Enhanced logging capabilities to facilitate timely problem resolution

- Removed dependencies to use MAPI for email messages. SMTP now fully supported.

- Additional options for extracting DTMF codes for routing from any DID number

- In addition to printing, transmission reports can now be saved as files and sent as email attachments.
