

**For Immediate Release:**

## **DPD International Partners with etherFAX to Extend GoldFax Enterprise Fax Solutions to the Cloud**

**Marlboro, NJ (May xx, 2012)** - etherFAX, LLC, today announced a partnership with DPD International, makers of the GoldFax™ enterprise fax server solutions which is used by over a million people every day. Through the partnership, GoldFax will utilize etherFAX® to cloud-enable the company's GoldFax for Windows® software. With etherFAX, GoldFax customers can securely send and receive business-critical fax communications via the Internet, significantly reducing costs and eliminating costly and complex telephony infrastructure.

etherFAX is changing how faxes are typically sent and received. Its patent-pending technology leverages the Internet instead of PSTN networks to manage incoming and outgoing fax communications. Extending existing fax servers such as GoldFax to the cloud, etherFAX removes the need for costly components such as fax boards, media gateways and FoIP drivers. It also eliminates recurring telephony expenses. Through its infrastructure as a service (IaaS) model, etherFAX hosts a vast array of virtual ports, making them available to send and receive high volumes of fax transmissions.

GoldFax offers enterprise fax server functionality at a small business price and is used by small businesses, department workgroups, and enterprise corporations. GoldFax eliminates all of the limitations of conventional paper-based fax devices and significantly improves fax document productivity, security and compliance, while reducing operational costs. It can integrate with any software application, email environment, document management system, and multifunction products (MFPs).

"For nearly two decades, GoldFax has been considered the gold standard in fax automation, continuously evolving and adding new features and functionality" explained Bill Vanek, GoldFax Director of Sales. "etherFAX offers an innovative new approach to manage fax communications via the cloud. Integrating GoldFax with etherFAX gives our customers a new approach to reduce the total cost of their fax infrastructure and

greatly simplifies the implementation of the solution. All that is required is an Internet connection. Also, existing customers can benefit from cloud-based fault tolerance.”

“GoldFax is a leading fax server product line and we are pleased to partner with DPD International to deliver cloud-enabled fax solutions,” said Quinn Corey, Director of Sales at etherFAX. “Together we will continue to innovate and deliver fax solutions that keep pace with the changing needs of the market.”

Available today, the etherFAX solution is integrated with and fully supports GoldFax for Windows.

### **About DPD International**

DPD, the makers of GoldFax, is a 35 year old software solutions provider. GoldFax uses a unique, high performance architecture that gives an advantage over all other solutions.
